DETAILED ACTION

Drawings

1. The drawings were received on April 6, 2004. These drawings are not acceptable.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement figures which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments, or remarks, section of the amendment. Any replacement drawing sheet must be identified in the top margin as "Replacement Sheet" and include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheets must be clearly labeled as "Annotated Marked-up Drawings" and accompany the replacement sheets.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for

Art Unit: 2111

reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Claim Rejections - 35 USC § 102

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent Application Publication No. 2002/0095533 to Esterberg, et al. ("Esterberg").

With regard to independent claims 1, 7 and 12, Esterberg discloses a re-configurable interface, and a method of reconfiguring an interface, used in modular electronic architectures including: a host (Fig. 4, item 10); at least one module (Fig. 4, item 20) for interfacing with the host to provide additional functionality to the host; and a configuration controller (Fig. 4, item 100; paragraph [0040]) located in the host for reading at least one memory device (Fig. 4, item 126; paragraph [0039]) located in the at least one module for providing configuration information to the host. Esterberg also discloses configurable logic (paragraph [0040]) operating with the configuration controller for configuring a host interface (Fig. 4, item 36) to operate with an at least one module interface (Fig. 4, item 34); and a plurality of connector pins at the host (Fig. 4, item 36 (A-J)) and at least one module (Fig. 4, item 34 (A-E, and J)) that are electrically configured using the configurable logic.

With regard to claims 2, 3, 6, 9-11, and 14-15, Esterberg discloses a re-configurable interface, where the configuration controller self-extracts the configuration information from the at least one memory device after interfacing with the at least one module with the host (paragraphs [0039]-[0040]), and the re-configurable interface further including a dedicated serial interface (Fig. 4, items 34 and 36) for exchanging

information from the at least one memory device to the configuration controller.

Esterberg also discloses the re-configurable interface, further including a microprocessor (Fig. 4, item 102) for communicating with the configuration controller.

Therefore, Esterberg reads on the invention as claimed.

Response to Arguments

3. Applicant's arguments (see pages Paper No. 3, filed April 6, 2004), with respect to the rejection of claims 1-16 under 35 U.S.C. 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of the newly found prior art reference, U.S. Patent Application Publication No. 2002/0095533 to Esterberg, et al. ("Esterberg"). Esterberg teaches the invention as claimed.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
